

Smoltek newsletter, January 2022

Hello dear subscriber,

Here are the highlights of this newsletter:

- Extended license agreement
- New CTO hired
- CEO buys 50,000 shares
- New patent granted

License agreement for evaluation of CNF-MIM technology extended

The license agreement for evaluation of the CNF-MIM technology that was first signed in April 2020 with a global manufacturer of electronic components has been further extended. The customer sees the great potential in the company's CNF-MIM capacitor technology and the evaluation of the technology has progressed for each sub-objective of the evaluation license. This new extension shows the willingness of both parties to take the cooperation further, and continue towards the next stage of development within the framework of the cooperation, without losing momentum.

Farzan Ghavanini will take over as new CTO

Smoltek has recruited Farzan Ghavanini as new Chief Technology Officer (CTO) who will assume the position on April 1 2022, and he will then succeed Peter Enoksson, who has been acting CTO since 20 September 2021. In addition to have a solid experience from leading positions in technology development at innovative companies and a deep research background in nanotechnology, Farzan also has extensive knowledge in the industrialization of nanotechnology. Most recently Farzan Ghavanini comes from the position as Director, Head of New Technology Development Department at Fingerprint Cards.

Smoltek's CEO buys 50,000 shares in the company

On January 20, it was announced that Smoltek's CEO, Håkan Persson, had bought 50,000 shares in the company. The shares were bought from the two largest owners, Finn Gramnaes (30,000) and Peter Enoksson (20,000). The acquisition was completed on January 20, 2022 at a price of approximately SEK 27.10 per share, which was determined on the basis of the volume-weighted average price of the Company's share during the ten trading days preceding the transaction date. The entire transaction corresponds to a total purchase price of SEK 1,354,840.07.

New patent now granted

Smoltek's 71st patent has been granted in Korea and is covering the invention and manufacturing of extremely thin energy storage devices embedded in an interposer. Our energy storage device concepts may take many forms e.g. discrete, integrated, or it can take the form where the end result is an interposer with CNF-MIM capacitors embedded in it. This also means that the global Smoltek patent portfolio now comprises 71 granted patents.
